Portfolio <https://ivanzapatarivera.com/>

GitHub <https://github.com/johnsbrook>

Full Stack-Flex web developer with a Certificate from Rutgers University: Honed skills in HTML5, CSS, JavaScript (Vanilla, jQuery, Handlebars and Sequelize), MySQL and MERN Stack (MongoDB, Express, React and Node.js) to create responsive web apps that may be used online and offline with a mobile first approach. Diverse professional background includes managing teams of more than 200 employees and completing projects that required learning new technologies and managing tight customer set deadlines.

Technical Skills

- | | | | |
|--------------|-----------------|-----------|---------|
| • React | • Vanilla | • API | • CSS |
| • Node.js | • jQuery | • Axios | • JSX |
| • Express | • Handlebars.js | • JSON | • MySQL |
| • JavaScript | • Sequelize | • MongoDB | • HTML5 |

Projects

Employee Directory (GitHub Repository | Deployed Application - GitHub Pages)

- Coded using React with JavaScript, JSX, Axios, JSON, API, HTML5, and CSS.
- Allows users to filter employees and order them alphabetically.

PhotoLog (GitHub Repository | Deployed Application - Heroku)

- Node.js app that allows users to post timeline messages, log photos and organize by location albums.
- Code uses JavaScript, MongoDB (mongoose and mongoose), Express, HTML5, and CSS.

Employee Tracker (GitHub Repository | Deployed Application - Demo on YouTube)

- Node.js application that allows the user to update employee, department and role information with CLI.
- Written with JavaScript, MySQL, Util, RxJS, and Inquirer.

Experience

United Airlines, Inflight Services, Newark, NJ, May 2012 - Present

- Manage a group of over 200 employees with a safety, caring, dependability, and efficiency approach.
- Create operations, performance and forecast reports resulting in reduced operational delays based on data
- Manage inflight aspects of the operation creating cohesiveness among engaged departments
- Flight attendant providing safety and passenger comfort with recognition from top revenue customers

Banco Santander, Rules and Procedures Officer, San Juan, PR, June 2009 - April 2012

- Project planning around the needs of the organization's departments with tight deadlines and regulations
- Member of team that designed and implemented the Procedures Standardization Program for Santander Mortgage resulting in time and procedural efficiencies lowering costs and increasing revenue
- Drafted manuals in English and Spanish to document procedures regulated by State and Federal governments
- Supported corporate communication between companywide Departments, Legal Division and Compliance

Education
